8/14/70

Dear Harold,

Received your 8/11 mailing plus the photos yesterday. Many many thanks for all the troubles I know you had to go through to get these. They are quite good and interest me much, as the enclosed memo points out. —WILL SEND MONEY LATER.

The news of the Ray trial two days ago is exciting. I thought the only thing now was the file cover and that you were already promised it by someone other than Eardley?

The JPA on the 133A and B back does stand for Adamick who identified the pix on the basis of his initials.

The autopsy ath sent by the A does not bear an identification but I asked for it from the JFK 4-1. It is identical to yours, same defects from copying, etc.

If you do not yet know that I am top contender for the title of the cat who died of curiosity, you don't know me very well. So when you tell me you have something on 16 mm. you "know" I'd want to see but you can't write about it you should know that I'd be curious as hell! Hints? I'll check the papers for 16 mm. projectors. Question: How expensive can cheap be?

News that spectro has been filed is encouraging. As I said, if you send me a spare copy of a suit, I can have it copied and return to you, possibly even get another copy for you, depending on length of suit.

I'm enclosing a Xerox of a better copy of the letter you wanted.

Also enclosed are two things I borrowed when last there. Sorry for the delay, but I've not been able to get in town to the Xerox place that does my lengthier stuff. I had a load of stuff from Dick, too. Both of these things go in the PM II file, as is written on the back of the last page of each.

Nothing else of importance comes to mind. Have to split.

Best,

Harold
